MAP SHEET 52

(Updated 2006)

Aggregate Availability in California

by
Susan Kohler

California Geological Survey (CGS) Map Sheet 52, scale 1:1,100,000, and this accompanying report provide general information about the current availability of California's permitted aggregate resources. Map Sheet 52 (2006) is an update of the original version published in 2002. This updated Map Sheet 52 summarizes data from reports compiled by the CGS for 31 aggregate study areas throughout the state. These study areas cover about 25 percent of the state and provide aggregate for about 90 percent of California's population. This report is divided into three parts: Part I provides data sources and methods used to derive the information presented, Part II compares the updated 2006 Map Sheet 52 to the original map, and Part III is an overview of construction aggregate.

Map Sheet 52.....\$25.00
Shipping and Handling.....\$6.00
